**Maury Regional Medical Center to Implement ProVation® Order Sets,
*powered by UpToDate® Decision Support***

MINNEAPOLIS, MN - May 4, 2011 - [Wolters Kluwer Health](#), a leading global provider of information for healthcare professionals and students, announced today that Maury Regional Medical Center has selected [ProVation® Order Sets](#), *powered by UpToDate® Decision Support*, as the facility's electronic order set solution.

Located in Columbia, Tenn., [Maury Regional Medical Center](#) serves as the flagship hospital for a group of facilities, including Marshall Medical Center, Wayne Medical Center, Lewis Health Center and Spring Hill Health Center. These facilities serve more than 260,000 men, women and children in the region of southern Middle Tennessee. Maury Regional has been recognized by the Premier healthcare alliance as a winner of the Premier Award for Quality and has earned an Excellence Award in the annual Excellence in Tennessee recognition program administered by the Tennessee Center for Performance Excellence (TNCPE).

ProVation Order Sets, *powered by UpToDate Decision Support*, is an easily customizable order set authoring and management solution that provides flexible integration into clinical processes to streamline the delivery of standardized care for improved patient safety, outcomes, clinician performance and regulatory compliance. ProVation Order Sets is built upon ProVation Medical's award-winning, clinician-designed technology platform. One of its primary values is the continuous updates to clinical content and medical evidence, including direct links to UpToDate, the resource of choice for more than 450,000 users worldwide.

Central to this capability is the One-Click Updates tool, which leverages UpToDate's Practice Changing Updates, which highlights new recommendations that could potentially change usual clinical practice. Enabled by a unique, structured approach to data management, One-Click Updates alerts end users to evidence that may trigger the need to modify particular order sets. It then enables users to review recommended updates and apply them in a single step across multiple order sets.

[UpToDate](#) covers more than 9,000 topics in 17 medical specialties and includes more than 77,000 pages of text and graphics, more than 328,000 Medline references and a drug database. Content is continuously reviewed and updated by physician editors and authors.

In addition to integrated links to UpToDate and other trusted sources of medical evidence, ProVation Order Sets offers the flexibility to link additional clinical resources based upon client needs and preferences. Further, to help facilities achieve the highest possible degree of automation, ProVation

Order Sets features vendor-neutral mapping and export capabilities that allows for flexible integration into any facility or vendor EMR or CPOE system.

“Maury Regional Medical Center is dedicated to providing the highest quality healthcare to the communities served, as evidenced by its numerous awards and recognitions,” said **Arvind Subramanian**, President and CEO, Wolters Kluwer Health Clinical Solutions. “We are pleased that it has chosen ProVation Order Sets, *powered by UpToDate Decision Support*, to further this mission and provide comprehensive decision support at the point of care.”

Wolters Kluwer Health’s Clinical Solutions business unit provides evidence-based medical content, workflow-based application software and services that allow clinicians to efficiently and effectively diagnose and document patient care. Key brands ProVation Medical, UpToDate®, Medi-Span®, Facts & Comparisons®, Pharmacy OneSource® and Medicom (China) lead in market segments that include drug information, disease information, clinical patient order sets, clinical documentation and hospital pharmacy productivity applications.
