

ProVation® Order Sets

powered by UpToDate® Decision Support

ProVation Care Plans integrate into clinical workflow, delivering the best treatment through evidence-based guidance at the point of care.

Own

ProVation Care Plans allow you to efficiently treat patients with current, concise evidence using regulatory standards and performance measures while adhering to nursing diagnoses, interventions, and outcomes of the Clinical Care Classification (CCC) system.

Create

Customize, modify and maintain your care plans with our easy-to-use-tools. Your team will be able to create educational programs, procedures and guidelines based on recent evidence. You will have the ability to merge multiple plans, eliminate duplicates and easily integrate nursing care plans in paper or electronic format into your EMR or clinical information system based on patient specifics.

Maintain

Save time, improve productivity and increase bottom line results when you establish clinical consensus on standard of care. Control patient safety by reducing the risk of error and liability.

ProVation Care Plans arm your team with actionable evidence and care processes they need to effectively:

- ◀ Enhance their Practice
- ◀ Improve Patient Safety
- ◀ Demonstrate Compliance with Credentialing and Regulatory Standards.

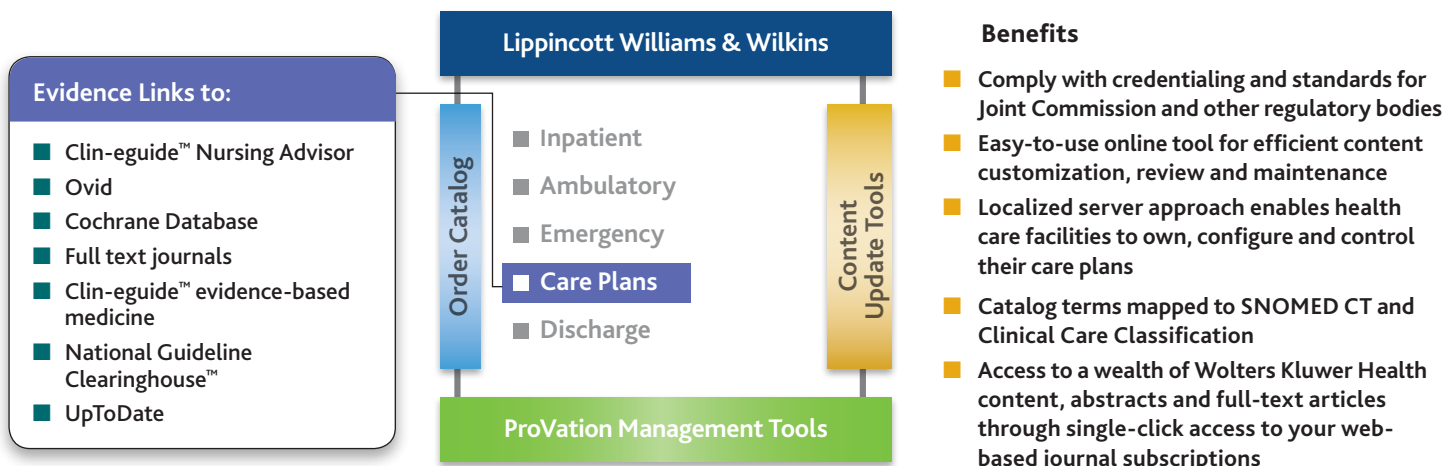

Powerful Content Built by Nurses

Built by an in-house team of nurses, ProVation Care Plans combines evidence from such sources as UpToDate®, Medline, Nursing Advisor & National Guidelines with the award winning technological platform from ProVation Medical. Together they deliver the unsurpassed resource for allied health professionals.

ProVation Care Plans

Benefits

- Comply with credentialing and standards for Joint Commission and other regulatory bodies
- Easy-to-use online tool for efficient content customization, review and maintenance
- Localized server approach enables health care facilities to own, configure and control their care plans
- Catalog terms mapped to SNOMED CT and Clinical Care Classification
- Access to a wealth of Wolters Kluwer Health content, abstracts and full-text articles through single-click access to your web-based journal subscriptions

Lippincott Williams & Wilkins ProVation Care Plans were created in partnership with the experts at Lippincott Williams & Wilkins, the leading international publisher of nursing information like the *American Journal of Nursing*, *The Nurse Practitioner* and Lippincott's *Nursing Procedures & Skills*—giving your team expert sources and content to rely upon.

Care Plans With more than 170 Care Plan templates available, each associated with a nursing or medical diagnosis, your team will have the ability to associate risk factors and assessments, measure expected patient outcomes, prelude interventions, and embed links to current evidence performance measures and quality indicators.

ProVation Management Tools Simplifies the development and management process through our premier care plans, evidence links such as: Clin-eguide Nursing Advisor, Ovid and Cochrane Database — just to name a few. This allows users to define the review process and create a centralized library and archive for each care plan.

Trusted Experience

- More than 200 years of medical publishing experience
- Content breadth and quality with over 4,000 publications
- Dedicated customer support and commitment and a proven implementation process based on more than 15 years of experience
- Hundreds of experienced physicians, nurses and pharmacists on staff developing content for solutions like ProVation® software, UpToDate, Facts & Comparisons® and Medi-Span® drug information
- Continual, rigorous product development and collaboration with customers
