**The University of Texas Medical Branch to Implement ProVation® Order Sets,
*powered by UpToDate® Decision Support***

MINNEAPOLIS, MN - Jun 2, 2011 - [Wolters Kluwer Health](#), a leading global provider of information for healthcare professionals and students, announced today that The University of Texas Medical Branch has selected [ProVation® Order Sets](#), *powered by UpToDate® Decision Support*, as the health system's electronic order set solution.

Located in Galveston, Texas, [The University of Texas Medical Branch](#) (UTMB) campus includes four health sciences schools, three institutes for advanced study and a health system offering a full range of primary and specialized medical services throughout Galveston County and the Texas Gulf Coast region. It also features a research enterprise that includes one of only two national laboratories dedicated to the safe study of infectious threats to human health.

ProVation Order Sets, *powered by UpToDate Decision Support*, is an easily customizable order set authoring and management solution that provides flexible integration into clinical processes to streamline the delivery of standardized care for improved patient safety, outcomes, clinician performance and regulatory compliance. ProVation Order Sets is built upon ProVation Medical's award-winning, clinician-designed technology platform. One of its primary values is the continuous updates to clinical content and medical evidence, including direct links to UpToDate, the resource of choice for more than 450,000 users worldwide.

Central to this capability is the One-Click Updates tool, which leverages UpToDate's Practice Changing Updates, which highlights new recommendations that could potentially change usual clinical practice. Enabled by a unique, structured approach to data management, One-Click Updates alerts end users to evidence that may trigger the need to modify particular order sets. It then enables users to review recommended updates and apply them in a single step across multiple order sets.

[UpToDate](#) covers more than 9,000 topics in 17 medical specialties and includes more than 77,000 pages of text and graphics, more than 328,000 Medline references and a drug database. Content is continuously reviewed and updated by physician editors and authors.

In addition to integrated links to UpToDate and other trusted sources of medical evidence, ProVation Order Sets offers the flexibility to link additional clinical resources based upon client needs and preferences. Further, to help facilities achieve the highest possible degree of automation, ProVation Order Sets features vendor-neutral mapping and export capabilities that allows for flexible integration into any facility or vendor EMR or CPOE system.

“The University of Texas Medical Branch is dedicated to improving the health of the people of Texas and worldwide,” said **Arvind Subramanian**, President and CEO, Wolters Kluwer Health Clinical Solutions. “We are pleased that it has selected ProVation Order Sets, *powered by UpToDate Decision Support*, to further this mission and provide evidence-based decision support across its health system.”

Wolters Kluwer Health’s Clinical Solutions business unit provides evidence-based medical content, workflow-based application software and services that allow clinicians to efficiently and effectively diagnose and document patient care. Key brands ProVation Medical, UpToDate®, Medi-Span®, Facts & Comparisons®, Pharmacy OneSource® and Medicom (China) lead in market segments that include drug information, disease information, clinical patient order sets, clinical documentation and hospital pharmacy productivity applications.
